DETAILED ACTION

1. This action is in response to application, filed on July 15, 2003 has been considered but are deemed moot because of Restrictions Request below.
2. Claims 1-4 are canceled. Claims 5-39 are pending.

Election/Restrictions

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143). Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 5-21, drawn to method, determining a priority of a received item utilizing the trained classifier and item priority is utilized to facilitate electronic communication, which is message priority, classified in class 709, subclass 207.
- II. Claims 22-33, drawn to method, routing the item for communications based on at least a routing criteria and generated priority, which is prioritizing data routing, classified in class 709, subclass 240.

- III. Claims 34-39, drawn to system, trains a classifier utilizing predefined data sets, classifying a received item, which is data classification, classified in class 707, subclass 7.

4. The inventions are distinct, each from the other because of the following reasons.

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I can be used for determining a priority of a received item utilizing the trained classifier and item priority is utilized to facilitate electronic communication, which is message priority. Invention II can be used for routing the item for communications based on at least a routing criteria and generated priority, which is prioritizing data routing. Invention III can be used for trains a classifier utilizing predefined data sets, classifying a received item, which is data classification. See MPEP 806.05(d).

5. Because these inventions are distinct for reasons given above and have acquired separate status in the art as shown their different classification, restriction for examination purpose as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I and II are not required for Group III each other, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

8. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicants is reminded that upon the cancellation of claims to be non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).
